*After his forensic interview, a client was exploring our therapeutic playground with his mom & advocate. He **LOVES** bugs, and his face lit up with each new critter he found.*

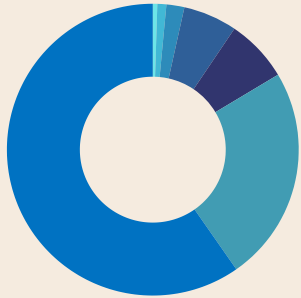

*Then, a butterfly landed on his hand, and he froze, watching it in awe. Tears welled up in his mom's eyes as she watched, whispering,*

**"IT FEELS LIKE A SIGN...  
EVERYTHING IS GOING  
TO BE OKAY."**

*In that moment, the butterfly seemed to symbolize hope and healing for them both.*
